## Summary

To obtain a job within my chosen field that will challenge me and allow me to use my education, skills and past experiences in a way that is mutually beneficial to both myself and my employer and allow for future growth and advancement.

---

## Experience

### Velocity Cubed

**November 2022 - Present**

Senior Developer 1

Sandton

🔗 <https://velocitycubed.com/>

During my time here, I have been involved with 2 projects, an administrative project and a financial project.

For the administrative project, we linked 2 systems that the client uses into one system so that it is easier for them to bill their customers.

The financial system, I came in to support the system as it has already gone live. It consists of getting transactional data from the banks and data from the travel agencies and matching them together and sending the combined data to their customer. So I would fix any issues that arise in the system or implement feature requests for the system.

Both systems are built and maintained in C# as the primary backend language.

I have also hosted 2 brown bag sessions during my time here for me to show new technologies for my colleagues.

### Securities and Trading Technology

**2020-12-17 - 2022-11-23**

Backend Developer

Bedfordview

🔗 <https://www.stt-software.com/>

During my time here I have worked on a market surveillance product and the rewrite of that product. This has exposed me to working with docker, Kubernetes and Azure DevOps builds and pipelines. I also manage the company's Kubernetes clusters.

### Sybrin Systems

**2017-01-03 - 2020-12-15**

Software Developer

Fourways

🔗 <https://corporate.sybrin.com/>

During my time here, I have increased my experience with dealing with customers including having internal training on how to handle them. While here, I have worked in both support and projects and because of this whenever an issue arises, I have less trouble identifying them and resolving them and be able to design a system end to end. In doing this my skill in SQL, C# and analytical thinking has increased because of the frequency that I have to employ them. I have worked in both the support and projects sections. While in the support space, I was looking after the same client for a year and a half, solving any issues that they logged. While in the project space I worked with multiple clients while completing their projects.

Education	<b>The Belgium Campus</b> Software Engineering  <a href="https://www.belgiumcampus.ac.za/">https://www.belgiumcampus.ac.za/</a>	<b>2013-01-01T10:32:47.000Z - 2018-05-01T10:32:57.000Z</b> Bachelors in Computing Software Engineering
